

Matching Questions

With this question type, two lists are presented to Students; Students must match terms from the first list to the second list.

Example: Match the following capitals with their countries:

Moscow	Canada
Ottawa	France
London	Italy
Paris	England
Rome	Russia

Question

*Title:

HTML Creator: On / Off

Question text:

Use HTML | Insert equation:

Image:

- Give the question a **title** so that you can distinguish it once it is in your question database. This **Title** will be visible to students unless you change the default in Assessment Settings.
- Type in the **Question text**. Insert an equation if needed. You may insert an image for this question by clicking **Browse**.

Matching Pairs

Column 1: Displayed in a fixed order. Column 2: Ordered randomly in a drop-down list.

Column format: <input type="button" value="Short Answer"/> <input type="button" value="Long Answer"/>	Column format: <input type="button" value="Short Answer"/> <input type="button" value="Long Answer"/>
<input checked="" type="checkbox"/> Use HTML	<input checked="" type="checkbox"/> Use HTML
<input type="text"/>	matches <input type="text"/>
<input type="text"/>	matches <input type="text"/>
<input type="text"/>	matches <input type="text"/>
<input type="text"/>	matches <input type="text"/>
<input type="text"/>	matches <input type="text"/>

- **Select** the column format for each column. The default column format is **Short Answer**.
- To enter long answers in the column, click **Long Answer**.
The screen updates and the long answer text boxes appear.

- In the text boxes, enter the **terms** to be matched.

- To create more matched pairs, click **Create Additional Pairs**.
The screen updates and additional text boxes appear for **Column 1** and **Column 2**.

Settings	
Grading scheme:	<input checked="" type="radio"/> Equally weighted / All answers have equal value. <input type="radio"/> All or nothing / The student must complete all matches correctly to receive full value for the question. <input type="radio"/> Right minus wrong / The total value is derived from the number of correct matches minus the number of incorrect matches.
Column preview:	<input checked="" type="radio"/> Preview both columns / Required when using the long answer boxes. <input type="radio"/> Do not preview both columns

Select a **Grading scheme**:

- To set the grading scheme so that each correct match counts for a portion of the total question score, select **Equally weighted**.
- If **All or nothing** is selected, the student must complete all matches correctly to receive full value for the question.
- To set the grading scheme so that the value of all incorrect matches is subtracted from the value of all correct matches to arrive at the final score for the question, select **Right minus wrong**.

Under **Column preview**:

- To preview both columns of data, in addition to displaying the first column as fields and the second column values as dropdown lists, select **Preview both columns**.
- To display only the first column as fields and the second column values in dropdown lists, select **Do not preview** both columns.
