

# Using Selective Release

**Selective Release** allows the instructor to provide students with course contents, assignments and assessments based on one or more of four criteria: Date, Member, Group, and Grade Book.

The **Selective Release** link is located on the **Designer Tool** menu on both the Build and Teach tabs

**Selective Release** gives you two option tabs: **Course Content** or **Members**.

**Course Content** displays by default. Use the **Course Content** option to release specific components in the course.
